Of. DSB-179/20

Dr. Marcos Algara-Siller
Director of the Environmental Agenda UASLP
Present

Dr. Algara-Siller,

I write to inform you of the data requested from my office, regarding the compilation of the criteria for the GreenMetric International ranking.

- Number of scholarly publications on sustainability**

The search for academic publications was carried out by the Library System of the Autonomous University of San Luis Potosí. The results of recent years is based on the search conducted in the Institutional Repository: <http://ninive.uaslp.mx> and the SCOPUS database belonging to ELSEVIER. The search keywords that were used were: sustainability, environment, sustainable development, development goals, renewable energy and climate change. The default fields (metadata) applied were; title, keyword and abstract.

The results are:

PALABRA CLAVE/AÑO	2017	2018	2019	2020	Total
Sustainability	7	21	5	3	36
Environment	38	39	51	4	132
Sustainable development	2	9	5	0	16
Development	21	33	23	3	80
Sustainable	9	20	9	2	40
Green	12	12	14	3	41
Renewable energy	6	4	4	0	14
Climate change	7	10	7	0	24
Total	102	148	118	15	383

I hope this information will be useful to positioning the sustainability efforts of our Autonomous University of San Luis Potosí high in the GreenMetric International ranking.

Best regards,

Dra. Guadalupe Patricia Ramo Fandiño
Director of the Library System of the Autonomous University of San Luis Potosí
