[2] Energy and Climate Change (EC)

[2.10] Greenhouse gas emission reduction program

We have several greenhouse gas emission reduction programs, among which is the institutional program UniBici.

Program of activities for the 2020 sustainable urban mobility month.

## **UI Green Metric Questionnaire**

#### **Description:**

Events achieved in 2020 like "Cebratón" aim to do artistic pedestrian paths to reclaim safe walking spaces. Other programs like "Viernes de Bici" (bike on Friday) promote the use of cycling as a healthy and safe transport to use at least one day of the week and above all during the Covid-19 pandemic as an alternative to collective transportation.

Flyer and photos of event "Viernes de Bici"

## **UI Green Metric Question naire**

The institutional program UniBici is focused on the promotion, the generation of incentives and the improvement of the cycle infrastructure to encourage bicycle use. We think of the bicycle as an insignia to favor sustainable urban mobility in the university community and thus avoid the generation of greenhouse gas emissions.
